May Gardening Tips

- Rotate vegetable crops to help control pests, disease and keep the soil in good condition.
- For better blooms next year, resist the temptation to cut back your daffodils until they have almost completely died back.
- If you aren't planning on making wine from your dandelions this year, why not EAT them? They contain more vitamin A than carrots and twice as much spinach.
- Purchase annuals without flowers so that you can enjoy the blooms longer. Choose shorter bushy plants because the larger ones are more established already and may not transplant as well.
- A dark green color is generally a good indicator of a strong healthy plant. (Make sure that they are not light colored or yellowing. Nor should they have brown patches)
- When planting your annuals if you loosen up the roots a bit before planting it will stimulate stronger growth.

Neighborhood Notes

- Chuckholes on your street or court? Call the Mayor's Action Line at 327-4MAC. Maybe with a few more calls....we will get some action!
- Muskrat traps have been set out in the large pond north of the clubhouse. They are marked but please be aware of them.

In The Hood

Spring cleanup time is here. All residents are asked to help with cleanup on the common property. There is a pile of mulch in one of the wooded areas that needs to be spread out so bring your rake and join the fun.

Cleanup along the waterways is also needed. Please help keep MWP in good shape for the coming warm weather months.

Many hands make for light work.

Contact Patsy Funk or Jan Moorhead if you are interested in helping out with spring clean up or if you would like to make suggestions or help out with future projects.
